

Your Content Production & Collaboration Hub

DALIM ES streamlines asset management, review and approval, project management, and workflow automation, empowering teams to work smarter and deliver content faster.

Print-Ready Asset Management

- **Centralized Asset Hub:** Store, organize, and enrich assets with powerful metadata for easy discovery and reuse.
- **Advanced Search & Filtering:** Find the right assets instantly with granular search and filtering options.
- **Metadata Customization:** Capture essential asset details and use data to drive automation processes.
- **Archive Access:** Effortlessly retrieve past projects and assets for repeat orders.

Online Review and Approval

- **Color-Accurate Analysis:** Analyze files with color precision, densitometry, print measurements, and color profile simulation.

- **Pixel-Perfect Detail:** Zoom in for close inspection and visibility into printable layers.
- **Revision Comparison:** Highlight differences visually for accurate assessment.
- **Collaborative Feedback:** Streamlined annotation tools and real-time commenting for seamless teamwork.

Project Management & Planning

- **Robust Project Control:** Define tasks, automate assignment, track progress, and meet deadlines.
- **Interactive Flatplan:** Visualize print layout with sections, regions, and versioning.
- **Virtual Book Experience:** Create realistic flipbooks for review, approval, and reader engagement.
- **Workflow Integration:** Manage workflow stages and deadlines directly within the project.

Workflow Automation

- **Automation Maestro:** Build simple to complex workflows, eliminating manual tasks and ensuring consistency.
- **Data-Driven Intelligence:** Use data, conditions, and scripting for tailored, intelligent workflows.
- **Versatile Integration:** Trigger workflows from documents, projects, flatplans, and folders.
- **Customizable Toolset:** Expand functionality with a powerful scripting step for unique needs.

Streamlining Print Operations for Visibility & Efficiency

ES Enterprise Solutions gives you real-time visibility into print production, streamlining operations to meet deadlines and ensure quality output.

DALIM ES Print Production, Simplified.

Check out our website and book a personalized demo to take the next step in your company's print workflow journey.

Features

- **Centralized Digital Assets:** Easily find, filter, manage print files, and access archived jobs for repeat orders.
- **Intelligent Job Tracking:** Ensure all print components are easily tracked and sent to print together when ready.
- **Real-Time Project Visibility:** Monitor the progress of projects and orders related to print.
- **Streamlined File Processing:** Automate preflight, normalization, trapping, and approval in one workflow.
- **Color-Accurate Online Proofing:** Confidently review and approve print-ready files online.
- **Robust Analysis Tools:** Analyze printable information within your documents for pre-press accuracy.
- **Dynamic Imposition:** Save time, reduce waste, and maintain quality with flexible page layout.
- **Advanced Job Ticketing:** Capture detailed print specifications for automation and accuracy.
- **Smart Views:** Gain insights into project workflows and manage resources effectively.
- **Performance Insights:** Gain visibility into production metrics. Track efficiency, identify bottlenecks, and make data-driven decisions.

DALIM SOFTWARE is a “made in Germany brand” with over 35 years of experience and a passion for developing software for digital and print content production.
